

Reminder for the ND Calculus Placement Test due May 30, 2022

Dear newest Notre Dame students,

Congratulations again on the upcoming start of your first year at Notre Dame!

This email is a reminder and clarification about the Calculus Placement Test invitation that was sent on May 16th. A copy of the original message can be found [here](#). If you have already completed the test, thank you and no further action is needed.

Students considering one of the following majors **MUST** take the Calculus Placement Test by 11:59 PM EDT on **May 30, 2022**.

- all College of Engineering majors
- all College of Science majors and supplementary majors
- particular majors (including second majors) in the College of Arts & Letters: Computer Science, Economics, Math, Neuroscience, and Pre-health
- any student considering a health profession

You do **NOT** need to take the Calculus Placement Test if either of the following is true.

- Your intended college or field of study is not in the above list.
- You have earned a 5 on the AP Calculus BC exam, a 5 on the AP Calculus AB exam, or a 7 on the IB HL Math exam.

Please approach the Calculus Placement Test with the same seriousness as any other standardized test. **The test outcome will potentially change the number of semesters of math courses needed to satisfy your college or major requirements because it will help to determine whether you should register for MATH 10150 "Principles of Calculus" for the Fall semester.** "Principles of Calculus" is an introduction to calculus and prepares students for MATH 10350 "Calculus A" or Math 10550 "Calculus I." Note that MATH 10150 does not fulfill the University's Core Curriculum Quantitative Reasoning requirement.

In the section titled "Important Links" below, you can find step-by-step instructions on how to access the Calculus Placement Test and other useful resources. All sections must be completed by 11:59 PM EDT on **May 30, 2022**. Please visit the [ND Calculus Placement Test](#) website for more details.

If you have any questions, please email Chris Temple at ctemple@nd.edu.

Warm regards,

David Veselik, Assistant Dean, College of Science

Chris Temple, Academic Services Director, Center for University Advising
